

INSTRUCTION OF REGULATION NEVA CASE

NEVA case is designed for violas in size 15"- 16.5". The advantage of this case is the ability to adjust the width of the main compartment to the needs of the user.

In order to adjust the case, follow the sequence below:

1. Place the viola in the case.

If the instrument is placed in a case and there is no clearance, the case do not require further adjustment.

If there is clearance between the case and viola go to the next step.

2. Open the zippered pocket.

3. To pocket insert attached to the case plastic parts. Use enough plastic parts to eliminate clearance on the width.

4. Close the pocket.

Matching case to the frame of the instrument enables safe transport violas of different sizes.
